Safety Instructions

Warnings

1. This floor washing cleaner is a household product, and is not recommended for use in industrial, commercial or other severely dirty conditions.
2. To prevent project damage, please use the accompanying detergent if needed.
3. In order to prevent damage to the roller sponge, please do not clean sharp objects with this product.
4. Please do not use the floor scrubber to clean cement, gypsum powder, wall powder, other small particles that solidify easily, or large objects such as toys or spitball. Otherwise, the scrubber may suffer from blockage, motor burn, or other failures.
5. Please do not clean flammable or explosive materials with the floor scrubber or put these types of liquids in the water tank.
6. If the roller rolls wire or similar objects in while operating, please turn it off immediately and remove the wire to prevent damage to the machine.
7. Please do not tilt or invert the floor scrubber. Clean the dirty water tank after usage.
8. Please fully charge the machine before the first use or not using after a long time.
9. If there is a long time for not using, please charge it at least every three months.
10. Use a dry mop to wipe the floor scrubber instead of gasoline, cleansers, or other corrosive detergents to avoid the case cracking, fading etc.
11. Please do not let children to use or play with the floor scrubber.
12. If the floor scrubber is fully charged but unable to work, you must send it to a designated repairing shop for testing and repair. Do not disassemble.
13. The battery needs to be safely recycled. Do not discard by yourself.
14. In order to avoid danger, if the charging cable is damaged please visit the manufacturer's local repair department or similar department for professional replacement.
15. Please use the original adaptor.

Safety Instructions

Service restrictions

This product is designed for usage on Restrictions of Using only (such as tile, marble, wood, waterproof hard floors etc.). Please do not use the product to clean rugs or other non-waterproof floors.

Note:

This product is not suitable for rug or carpet cleaning.

- To avoid electrocution, please do not press on the power cord while using the machine.
- Make sure any parts of the body or large objects such as clothes, etc. is far away from the roller.

Start auto-cleaning. Please wait	Push the mode key quickly after the machine is correctly put on the charging base and enters charging mode
Turn voice on	Push the voice key to turn the voice on
Turn voice off	Push the voice key to turn the voice off

Product Operation

Assembly

- 1 Open the package and take out all the product accessories. Mount the handle on the machine and tighten the screws.

- 2 Take out the roller. If it is dry and stiff, please soak it in water (under 50 °C) and rub it evenly till it is completely soft. Then take it out of the water and squeeze any extra water out until it stops dripping.

Assemble the Roller

- 1 Put the roller into the machine from its side.

Product Operation

Install the Charging Base

- 1 Take the charging base component out from the package. Insert the plug of the charging base into the socket.

Charge

The orange light blinks during charging. The green light is on for 30s after charging. The light is on for 5s after the charging is interrupted.

Option1: Insert the power adaptor directly into the charging port.

Option2: Place the main body on the charging base, and connect to the socket for charging.

Product Operation

Install the Clean Water Tank

- 1 Please fill the clean water tank before using the product. Hold the square button on the top of the water tank to unlock it and put your hand on the latch to pull the water tank out.

- 2 To prevent it tilting, please grab the main body with your other hand to keep it upright.

Take the Roller Out

- 1 Press the roller button on the side of the mop and take the roller out after it pops out from one side.

Product Operation

Auto-cleaning of Roller

Put the main body on the charging base and quickly press the mode button for the roller to work automatically.

Lock and Unlock

Lock the main body

Push the lower part of the main body forward slightly until you hear a “click” which indicates the main body is locked in place.

Note:

Do not push the main body forward after it is locked. Otherwise, the product might be damaged.

Product Operation

Unlock the main body

Lift the product from the base and put it on the flat floor. Hold the handle and stabilize the mop with one foot. Then pull the main body backward gently until you hear a “click”, which indicates the main body is unlocked.

Clean the Floor

The product cleans forward or backward.

Do not lay the product down on the floor.

Maintenance

Clean the Roller

- 1 First remove any entangled hairs before cleaning the roller.
- 2 Clean the sponge roller (use the correct amount of soft detergent).

Note:

The active protection system is used to identify any malfunction during operation. When the system is activated, the product will immediately stop working to prevent damage. **If you want it to resume working, please follow the following instructions:** Active protection mechanism of the cleaning roller: if the cleaning roller is stuck, the main body will play the corresponding voice prompt: **"Please check the roller brush !"**.

- 1 Open the cover of the cleaning head and remove the stuck object.
- 2 If the stuck object is hard to find, please disassemble the cleaning roller to look better.
- 3 After the stuck object is removed, mount the cleaning roller back on the mop and restart the product.

Maintenance

Clean the Dirty Water Tank and Channel

Clean the dirty water tank

1 Push the button to open the cover.

2 Put your hand on the slot of the dirty water tank to remove it.

3 Open the cover on the side to pour out the dirty water.

4 Or push the latch on the dirty water tank to open it.

5 Please wipe the sensor sheet with a soft cloth regularly to maintain the water full alarm.

6 The snaps on both sides need to be installed in place.

Maintenance

- 7 After the dirty water is dumped out, put the tank back into the mop.

- 8 The top cover needs to be covered flat.

Note:

Please grab the dirty water tank with your other hand to keep it steady and prevent spilling.

Clean the channel

Push the button to open the cover. Take out the filter flexible glue or dirty water channel flexible glue, rinse it with clean water and mount it again.

Maintenance

The dirty water hole should be cleansed immediately if it spills during operation. The rubber cover may be removed to clean foreign matter if the channel is blocked.

Note:

Please disconnect the power adaptor to stop charging before maintaining or cleaning the product. Please clean the exterior of the main body regularly with a soft wet cloth. Do not use wire ball or other rigid cleaning tools or corrosive detergent to wipe the main body to avoid scratching or damaging the product.

Maintenance

Moving and Storage

Store the product

- 1 Please turn off the machine before storage. Lock the main body and put it back on the base.
- 2 Please cleanse the interior of cleaning head before storage to prevent bacteria and make sure the clean water/dirty water tank is completely emptied.
- 3 If the product is stored for over 1 week, please disconnect the power adaptor, cleanse the cleaning roller, and leave it on the base for drying to avoid odor from mold or deformation from extrusion.

Moving the product

- 1 Please turn off and lock the machine.
- 2 To move the machine, tilt it backward and roll it using the wheels on the bottom.

**Note:**

Please do not drag the machine if there are sand or sharp objects on the floor, to avoid scratching.

Active Protection System

An active protection system is installed on the product, if any large object such as a towel, curtain, etc. gets stuck, the product will stop working and give a prompt to ensure safety.

Troubleshooting

Problem		Solution
Abnormal amount of water leaked on the floor.	1. The cleaning roller is not fully soaked.	Soak the roller in water till it is soft, and squeeze out any extrawater before installation.
	2. The cleaning roller is deformed or not installed correctly.	Check the installation button and the appearance of the cleaning roller to see if it is mislocated or deformed. If so, please reinstall or replace the cleaning roller.
	3. There are too many obstacles in the sewage channel.	Please remove any obstacle with tweezers or other tools.
	4. The top cover of the mop is not pushed in place.	Put the upper cover on again and make sure both sides are buckled in place.
	5. The dirty water tank inlet is blocked.	Clean the blockage in the dirty water tank inlet.
The product cannot start.	1. The battery is drained.	Charge the product and restart it.
	2. The handle is not connected correctly to the main body.	Reconnect it.
	3. Reset the system.	Hold the power button for 7s.
Dirty water tank alarm.	The dirty water tank is not installed in place.	Reinstall the dirty water tank.
No warning when the dust tank is full	The dust is embedded in the sensor of the dust tank.	Wipe the dust with a towel.
There is foam in the garbage box.	Other detergent was used or a non-standard amount of detergent was used.	Only use the dedicated detergent for this floor scrubber. Use of other uncertified detergents can damage the product. Likewise, please use the correct amount of detergent.
