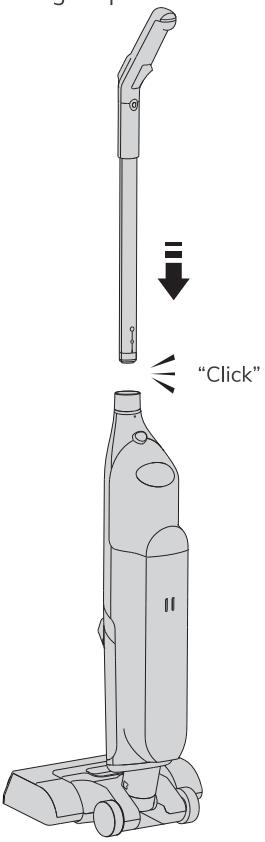
Product Assembly

Handle Installation

As shown in Figure 3-1, insert the handle into the corresponding top position of the main part, which includes buckles for positioning. You will hear a "click" after inserting. The completion of assembly is shown in Figure 3-2.

Removal of Handle

Poke a dull auxiliary tool (such as a bamboo stick) into the small hole as shown in the figure up to the handle puller button, then pull the handle straight up.



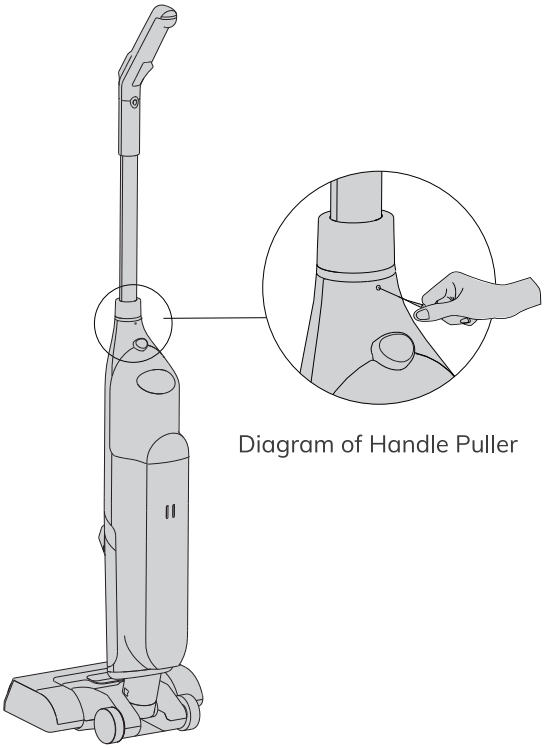


Diagram of Handle Puller

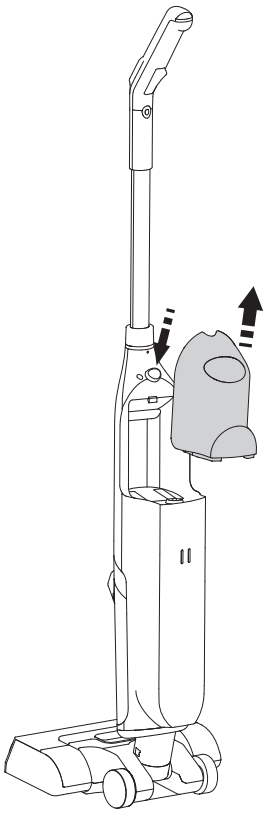
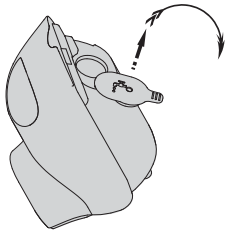
Add clean water to the clean water tank

1



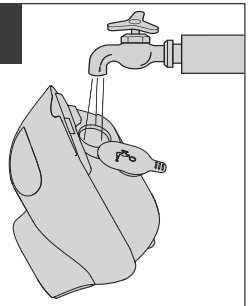
Press the button to take out the clean water tank.

2



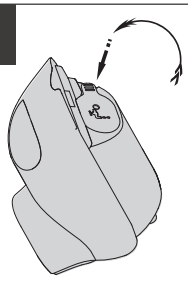
Open the soft rubber cover: lift and turn clockwise

3



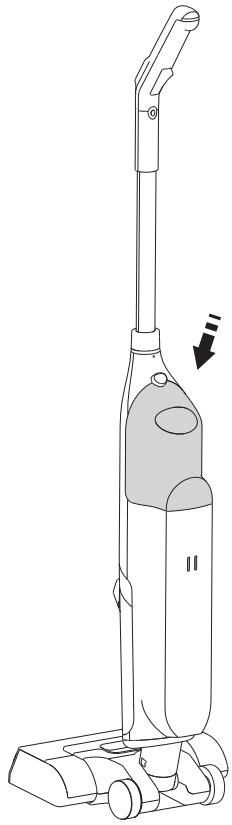
Add clean water, but do not exceed the MAX line.

4



Install the soft rubber cover:
turn counterclockwise and then press down.

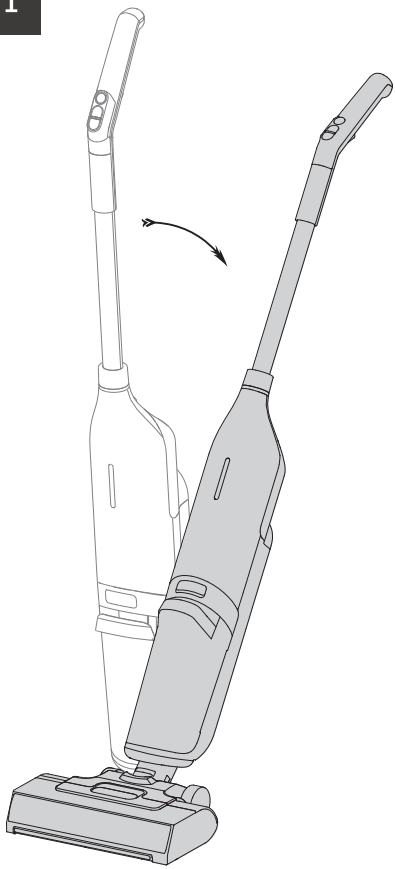
5



Put the clean water tank back onto the main part.
The installation is completeafter the "click" sound.

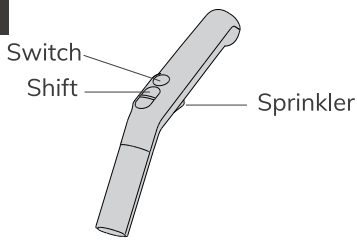
Floor Washing

1



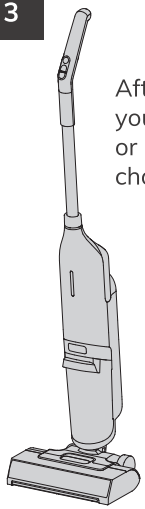
Please tilt the main part before pushing the switch button.

2



- Press the switch button. The power is on with the default setting to start the automatic mode.
- Press the switch button again to stop the machine;
- When the machine is running, press the shift button to switch between the "automatic/powerful" gears.
- Press and hold the sprinkler button to spray water, and release the button to stop the water spray.

3

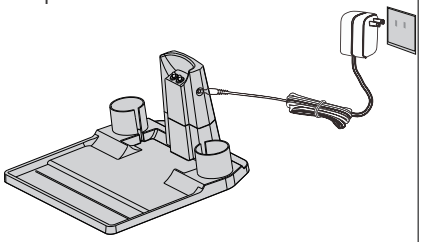


After using the machine, you can place it upright or put it back on the charging base.

Charge

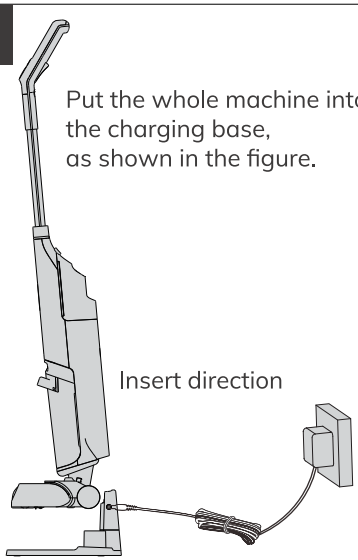
1

Connect the power adapter to the charging base, as shown in the figure and insert it into the power stripe.



2

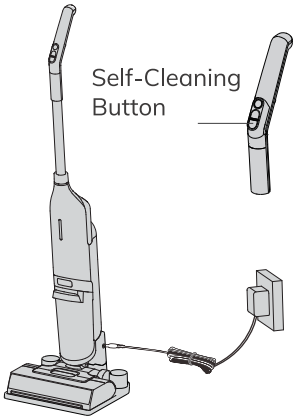
Put the whole machine into the charging base, as shown in the figure.



At this point, the display light on the main part turns orange, and the machine enters the charging stat e. When the charging is completed, the green light is always on (5 minutes later the machine enters sleep mode).

Self-cleaning

After cleaning the machine, put it back on the charging base. Please empty the waste water tank first, and ensure sufficient water inside. Press the self-cleaning button. The machine will enter the self-cleaning mode and stop automatically after one minute of cleaning and drying.



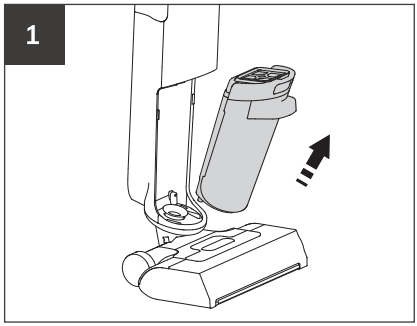
Warm tips:

"Self-cleaning function" can only be selected while charging with a battery power higher than 10%.

Regular Cleaning of Products

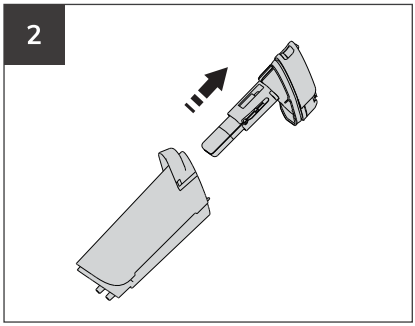
Clean-up of Waste Water Tank

1



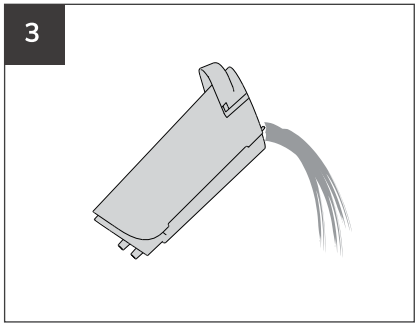
Press down the water tank button and take out the tank.

2



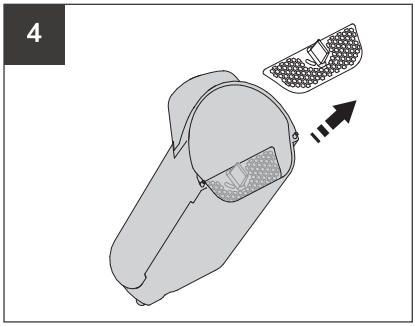
Take out the lid of the waste water tank.

3



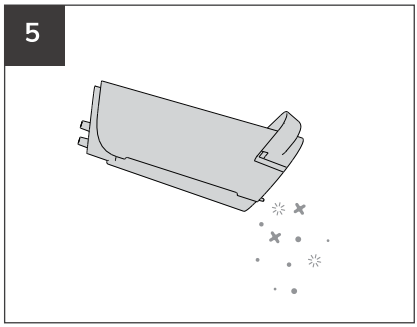
Pour the wastewater

4



Take out the filter holder.

5



Take out the solid waste

6
